Summary

Software developer with a strong foundation in **algorithms**, **data structures**, and **backend** tasks, focused on delivering results. Detail-oriented in understanding client requirements to provide effective code solutions. Proactive in **team communication**, sharing progress and challenges. **Fluent in English (C1)** and adaptable, I enjoy collaborating with diverse teams and cultures. Currently pursuing studies to become a **Data Engineer**.

Technical skills

- **Programming languages:** Python, Bash, SQL
- **Frameworks / libraries:** Pandas, FastAPI, Django
- **Databases & Warehouses:** MySQL, Postgres, Snowflake, RDS
- **Cloud services:** Amazon Web Services (AWS)
- **Other:** API REST development, Git, Linux
- **Tools:** Postman, Bruno, Trello, Slack, Notion

Soft Skills

- Active listening
- Proactiveness
- Teamwork
- Autonomy
- Problem-solving
- High tolerance for frustration
- Critical thinking

Professional experience

VORDENTECH

02/2024 - present

Python / ETL developer

US based company dedicated to the development of software solutions related to data engineering, ETL processes, and web development.

- **Developed software solutions in Python**, focusing on efficient and maintainable code.
- **Built and optimized data pipelines using the ETL framework and Pandas library**, improving data processing efficiency.
- **Delivered scalable solutions on AWS**, utilizing serverless services (Lambda, EventBridge, Step Functions, RDS, and CloudWatch) to ensure cost-effective and reliable deployments.
- **Developed a Snowflake infrastructure solution**, integrating Python, AWS Lambda, and API Gateway. Tackled challenges related to Snowflake security and API management, meeting tight deadlines while exceeding client expectations by proposing and implementing security improvements.
- **Collaborated using Git/GitHub**, contributing to the successful delivery of multiple projects through version control and peer code reviews.
- **Refactored and documented legacy code**, enhancing execution speed and data retrieval efficiency, with measurable performance gains.
- **Liaised with clients globally**, effectively clarifying ambiguous requirements leveraging strong communication skills in English (non-native) through text and voice channels, ensuring a clear understanding of their business needs and delivering tailored solutions.

Projects

- [esvdev.me](#) - Personal blog built with Django, Django REST, Wagtail CMS, Astro and TailwindCSS and deployed on a Digital Ocean droplet. I write technical articles about Python/software development and Data engineering. Source code available [here](#)
- **Community Founder and Manager** - Established and manage a Spanish-speaking WhatsApp community dedicated to learning and mutual support in technical fields. Foster collaboration and knowledge sharing, demonstrating strong leadership, initiative, and interpersonal skills.

Education and Certifications

- **Associate Data Engineer in SQL**, Datacamp (2024 - in progress)
- **Python Backend Bootcamp**, Codigo Facilito (2023)

Languages

- **English:** C1
- **Spanish:** native
